

Undergraduate Programmes - Individual Post-Module Assessment Report

Module code, initials and date: WM393, Young Saeng Park, 29/ 28/02/2022

Name of marker: Young Saeng Park

<p align="center">Awarded Mark (please note that this does not include late penalties, which will be applied to the mark in Tabula)</p>
68

NOTE: The mark recorded is subject to review by the Board of Examiners.

Please note: while each PMA is marked against assessment criteria that are specifically designed to evaluate that assignment, the descriptors listed on the following webpage will help you to interpret the mark awarded to your work:

<https://warwick.ac.uk/services/aro/dar/quality/categories/examinations/markings/ug2017/>

Module Learning Outcomes

The tutor has indicated below if you have achieved the module learning outcomes. They can be "Met", "Partially Met" and "Not Met".

Learning Outcome	Status
Apply the range of software tools used tools for configuration management, version control and software build.	Met
Discriminate the key concepts and techniques used in the Agile Manifesto and Scrum, carefully design and critically evaluate project plans using these techniques.	Met
Distinguish current and emerging XP, Lean, and Kanban values, principles, and practices, use these techniques to analyse and optimize process workflow.	Met

Please note: some module learning outcomes may be addressed by other assessments or in-module work.

Individual Comments

The tutor has provided specific comments on your work below and they may have provided an annotated script.

Strengths & Areas for Improvement
<p>It is good to include a block diagram in the overall description section. So, it can give the overall structure of your system to readers.</p> <p>Because the screenshots in the report are not provided enough, it is difficult to verify that the implementations are working properly from the report. So, you need to provide enough screenshots to your readers.</p>
How to improve
<p>It is good to include the problem statement to emphasise their importance, but it is not appropriate to include the languages and frameworks in the introduction section.</p> <p>The conclusion paragraph should summarise the key supporting ideas and wrap up your final thoughts and main points. However, your conclusion is very short to include them.</p> <p>As a reader, I recommend that the numbered format of headings and subheadings makes it much easier to find the right information, rather than having separate font sizes for headings and subheadings.</p>
Document structure, grammar, referencing
<p>The report contains many figures that address the results. If possible, it recommends that you should include a caption on each figure and table, and also a list of figures or tables should be included in the report. So, it will be easy to find them effectively.</p> <p>A reference gives the readers details about the source so that they have a good understanding of what kind of source it is and could find the source themselves if necessary. Thus, it is a good practice to provide any reference related to your content in the report.</p>
Anything else
